## PERSONAL PROJECTS

### ShirtsOnline - ecommerce site

- ShirtsOnline is ecommerce site where we can purchase shirts. It includes online payment (stripe Integration was used).
- Technology used - React.js, Express, Mongoose, HTML, CSS, Javascript.

### Tweetpy

- Tweetpy is a concept of social network developed to encourage the developers of a college to collaborate and share experiences. It has options to create posts, ability to follow users, hashtags, like or unlike any post and option to comment on any post.
- Technology used - Django, Javascript, HTML, CSS, Bootstrap.

### Insta clone

- Insta clone is a hybrid app inspired by the idea of Instagram. I developed this project during learning mobile app development using React Native.
- Technology used - React Native, Firebase.

### Passy

- A password manager app.
- Built for personal use where I can store all my passwords based on different categories, utilized local storage for keeping all data in encrypted manner.
- Technology used - React Native, Redux.

## ACHIEVEMENTS

Received on the spot award twice from TCS for Good performance and exceptional contribution for the CCT team.

Received star of the month award for my contribution in the project.
